SHRADDHA SUMAN

Senior DevOps Engineer | Site Reliability Engineer (SRE) | Cloud Engineer

Bangalore, India | +91-8489303943 | shraddha8489@gmail.com | linkedin.com/in/shraddha-suman17

Notice Period: 30 Days | Open to: India, Singapore, Australia, UK, UAE, Europe, Remote Worldwide

PROFESSIONAL SUMMARY

Senior DevOps Engineer and Site Reliability Engineer with 9 years of experience in cloud platform operations, release engineering, and application support. Deep production expertise in AWS EKS, multi-region Kubernetes with Karpenter, Docker, Terraform, GitOps (Argo CD), and CI/CD automation (GitHub Actions, Bitbucket Pipelines, Jenkins). Delivered 99.8% platform uptime, zero-downtime production upgrades, 35% MTTA reduction, and measurable cost savings for a global SaaS fintech across Singapore, Hong Kong, Australia, and UK. Pursuing AWS Certified DevOps Engineer - Professional.

CORE TECHNICAL SKILLS

Cloud Platforms: AWS (EKS, EC2, RDS/Aurora, S3, CloudFront, IAM, VPC, CloudWatch, Route 53), Azure, GCP

Containers & Orchestration: Kubernetes (EKS), Karpenter, Docker, Helm, Rancher, Microservices

Infrastructure as Code: Terraform, Ansible, YAML

CI/CD & GitOps: GitHub Actions, Bitbucket Pipelines, Jenkins, Argo CD, SonarQube/SonarCloud

Observability & SRE: Prometheus, Grafana, CloudWatch, Splunk, SLIs/SLOs, Incident Management, RCA, On-call

Scripting: Python, Shell/Bash, PowerShell, REST API integration, Jira Automation

Databases: MongoDB, PostgreSQL (Aurora/RDS), MariaDB, SQL Server, Oracle

Security & Compliance: IAM, RBAC, MFA, SSL/PKI lifecycle, Vulnerability Patching, DevSecOps

OS: Linux (Ubuntu, Amazon Linux, RHEL), Windows Server, VMware

KEY PROJECTS

- **Multi-Region EKS Migration to Karpenter:** Migrated EKS clusters across 4 regions (SG, AU, UK, HK) from managed node groups to Karpenter; led zero-downtime upgrades v1.28 to v1.32; maintained 99.8% uptime while reducing cloud spend.
- **Centralized Observability Platform:** Built monitoring stack (CloudWatch, Prometheus, Grafana) across 4 AWS regions and Azure VMs; automated Jira incident lifecycle via UptimeRobot webhooks, cutting MTTA by 35%.
- **Mobile DevOps Pipeline:** Built GitHub Actions + EAS (Expo) pipeline for a React Native app, automating code signing and App Store/Play Store submissions; reduced release effort by 60%.
- **DataOps Platform Isolation:** Designed isolated Karpenter node pools and a 3-layer IAM/RBAC access model for DataOps workloads across 4 EKS clusters, enabling scoped, auditable cross-team access.

PROFESSIONAL EXPERIENCE

Lead Solutions Engineer

Skan AI | *Sep 2026 – Present*

- Serve as Lead Solutions Engineer while covering hybrid DevOps and SRE responsibilities across infrastructure, observability, and release engineering.
- Deployed Tempo in non-production environments to enable distributed tracing and supported QA with end-to-end (E2E) testing.
- Leading an in-progress observability migration on Azure from ELK to the LGTM stack (Loki, Grafana, Tempo, Mimir); completed rollout in non-production environments and currently validating through testing ahead of production migration.
- Configured and maintained SMTP integration using ZeptoMail across production and non-production environments for reliable transactional email delivery.
- Set up effective and reusable CI/CD pipelines for application services and troubleshot infrastructure and deployment issues to support reliable, consistent application delivery.

Senior DevOps Engineer / Site Reliability Engineer

Sleek, Singapore (Global SaaS FinTech, Remote) | *Feb 2022 – Aug 2026*

- Maintained 99.8% platform uptime across multi-region EKS and AWS infrastructure for a global fintech client.
- Reduced MTTA by 35% through centralized observability (Prometheus, Grafana, CloudWatch) and automated incident response.
- Authored production Terraform modules for AWS infrastructure (EKS, RDS Aurora, S3, CloudFront, VPC, IAM) and implemented GitOps with Argo CD.
- Executed zero-downtime upgrades of MongoDB (to 8.0) and Aurora/RDS PostgreSQL (to 14.17) on live global traffic.
- Implemented Azure tenant-wide MFA and zero-trust IAM controls; managed SSL/TLS certificate lifecycle with zero outages.
- Built self-service developer onboarding platform (GitHub, Railway, Supabase), reducing DevOps dependency; used Cursor IDE and Claude CLI to accelerate scripting and documentation.

Awards: Sleek Star Award - Operational Excellence (2024); Sleek Values Award - Kindness (2025)

DevOps & Support Engineer

Tally Software, Bangalore, India | *Nov 2020 – Jan 2022*

- Managed Jenkins CI/CD pipelines and Git repositories, supporting developer branching and release workflows.
- Built Shell and Python automation for Salesforce dashboards and operational reports, cutting manual effort by 30%.
- Owned end-to-end SSL certificate lifecycle (DigiCert/PKI) with zero certificate-related outages over 14 months.

Release, Configuration & Application Support Engineer

Accenture, Bangalore, India | *May 2017 – Oct 2020*

- Improved release velocity by 15% through deployment automation across WebSphere, JBoss, Tomcat, and Apache environments.
- Reduced MTTR by 20% via proactive monitoring, alert tuning, and structured incident response; documented RCAs in Confluence.
- Provided L1/L2 application support and developed features using ASP.NET, C#, and SQL Server/Oracle for Fortune 500 clients.

Award: Tally Star Achiever Award

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Electrical & Electronics Engineering - Kumaraguru College of Technology, Coimbatore (2017)

AWS Certified DevOps Engineer - Professional (In Progress)
